

SIMPLE, FLEXIBLE

Can be mounted to a variety of different cab designs.

MANUFACTURING

Manufactured using

Bergstrom's World class

manufacturing systems

and processes.

DRIVER COMFORT

Provides maximum comfort by maintaining a comfortable temperature inside the cabin.

UTILIZES EXISTING VEHICLE BATTERIES

Possibility to add Bergstrom Solar Energy System and extra batteries for increased AC run time.

NITE PHOENIX ELECTRIFIED AC SYSTEM

Main advantages:

Durable steel construction

Best perfomance with four auxiliary AGM / deep cycle batteries.

California Air Resources Board (CARB) ARB #08-643-004. No emissions means no fines.

- Unit runs 8-10 hours*
- Virtually maintenance free

Adaptable to OEM ductwork in most applications

Recirculation filter give extended coil life

Serviceable evaporator coil, receiver drier and TXV

High efficiency brushless motors in compressor, evaporator blower and condenser fan for extended life.

First unit with wireless technology. Use the app to control the unit.

Depending on ambient temperature, solar load and truck insulation

The premier battery-operated AC system with wireless technology designed to fit all sleepers.

The NITE Phoenix features a brushless motor in the compressor and condenser fan for extended life. It saves up to 3,800 gallons of fuel per year on average and lowers your maintenance costs. With reduced idle time, less DPF maintenance is required, saving you time and money. It operates quietly, providing AC and heat for 8 to 10 hours and ROI for years to come.

Suggested Application

Your vehicle just became fully more efficient

Beating the heat comes down to one system: Phoenix. As a battery-powered, no-idling system, the NITE Phoenix generates the highest BTU/hr cooling capacity at 7,500 BTU/hr without sending damaging emissions into the environment.

TECHNICAL SPECIFICATIONS	
Cooling Capacity	2.200 W 7,500 BTU/hr
Power Consumption	12V, 650 watts
Elect. consumption	25-65 A/hr
Maximum air flow	400 m³/hr 235 SCFM

WEIGHT & DIMENSIONS	
Weight	23,6 kg 70 lb
Dimensions	559 x 432 x 280 mm 22 x 17 x 11 in

Note: The stock alternator will have to be replaced by an alternator with a minimum 30 amps additional charging capacity.
